- Web Technology

Projects

Feedback App | 🌐 | 🔗 | MERN Stack, Tailwind CSS, AG Grid, JWT

November 2023

- Designed and built a web-based Feedback App using React, Node.js (Express), and Tailwind CSS.
- Implemented role-based user authentication, allowing admins to add new teachers and admin users, manage feedback, and access attendance records.
- Teachers have access to view attendance records and provide feedback for their respective students.
- Integrated data export functionality, enabling users to export feedback data as CSV files for easy analysis and reporting.

Onetap - Personalized landing pages | 🌐 | 🔗 | MERN Stack, TailwindCSS, JWT

October 2023

- Developed Onetap app with JWT authentication for secure sign-up and login.
- Incorporated Tailwind CSS for a streamlined and visually appealing design, allowing profile customization with avatars.
- Provided users with professionally designed themes and templates for personalized landing pages.
- Enabled users to easily add and manage important links, simplifying online presence management for various professionals and content creators.

Glog - A Blog site | 🌐 | 🔗 | Reactjs, TailwindCSS, Firebase

August 2023

- Designed and developed a full-stack blog website, "Glog," using React, Tailwind CSS, and Firebase.
- Implemented Google Authentication for secure user login and authentication.
- Enabled users to create, read, update, and publish their blog posts, fostering an interactive and user-friendly platform.
- Demonstrated proficiency in front-end and back-end development, as well as database management, while creating a fully functional web application.
